

Entry-to Mid-Level Hydrogeologist

Landau Associates

Established in 1982, Landau Associates is recognized for excellence in the environmental, geotechnical, and natural resources consulting industry. With over 100 employees in six Pacific Northwest offices, we have shown that by creating a balance of exceptional client and employee satisfaction, we can produce profitable growth and an enduring, successful practice. As part of our continued success in the water resource, geotechnical and environmental remediation markets we have an opportunity for an entry-to mid-level hydrogeologist to join our Spokane, Kennewick, Edmonds and/or Tacoma Washington offices.

The successful candidate will provide field and office support on a range of groundwater related projects; groundwater supply and water rights, infiltration, groundwater modeling, remediation, and construction dewatering.

Qualified candidates will have a B.S. or M.S. in geology and/or hydrogeology and optimally possess strong education and/or applied experience in; well hydraulics, well drilling and construction/development methods, analytical and numerical groundwater modeling, aquifer testing, and groundwater sampling. Candidates should have strong written and verbal communication skills.

The firm offers competitive compensation and an excellent benefits package in an environment that promotes personal growth and professional advancement.

Qualified applicants please email your resume and salary requirements with this code: E-HYD-0818ROM, to hr@landauinc.com. We are an Equal Employment Opportunity Employer.
